

## Timemaster – Release Notes

### Timemaster V4 Release Notes Dated 11th May 2018

This document contains the release notes accompanying updates for Timemaster version 4.10.

It contains a list of changes and enhancements made to each version. Older release notes are available from the “Previous Releases” document.

Some updates require a database update to also be applied to add new tables or fields into the database. The database has a version number which should be checked prior to installing the windows or web program updates.

**If the database version is less than shown below do not install any program updates until the database update has been installed and completed with no errors.**

Web Version	4.10.1	UPDATED!
Windows Program Version	4.10.0	UPDATED!
Mobile App Version	Android 4.9.1.0	UPDATED!
	iPhone 4.9.1.0	UPDATED!
Required Database Version	4.10.0	UPDATED!

#### MUST READ SECTION

If you are the person responsible for installing the Timemaster update, please refer to the following document which will outline what is needed;-

**THIS VERSION REQUIRES CHANGES TO THE TIMEMASTER WEB SOFTWARE INSTALLATION. PLEASE REFER TO THE WEB INSTALLATION GUIDE FOR MORE DETAILS**

<http://download.equisys.com/pub/timemaster/files/UpgradingTimemaster.pdf>

If your version of Timemaster Web is less than version 3 please contract support for upgrade advice.

You need to run the “Refresh Report Selections and Menus” option under System Administration in the Windows application after installing this update.

### General Notes:

Please note that our support email address is now:-

[timemastersupport@equisys.com](mailto:timemastersupport@equisys.com)

To ensure your emails are actioned in the most efficient manner please ensure you use this email address.

(8781) Clients who use the standard Timemaster import program should no longer use the version they have as it is unsupported.

We have found that clients have imported data using an old format and the outdated version used did not populate all the data in the database and therefore caused data integrity issues.

The standard import program was written to migrate client data from their old time recording system into Timemaster. It was not, and should not, be used to update existing data within Timemaster.

If you have any queries regarding this, please contact the support desk on 01482 588532.

(9169) Windows – Not able to export to PDF from the Crystal Reports preview window in Windows 7.

This seems to be due to new font versions being issued which CR can't export to PDF.

To resolve this uninstall Microsoft update 3102429. For information relating to this update click this link;- <https://support.microsoft.com/en-gb/kb/3102429>
